Voting has officially begun here in Icenia and I have asked a few of those in office recently so we have asked some of the people in office a few questions about the upcoming election, what they plan to do if they are back in office and what they have done in their past term. As well as that, the competition for builds around the server is still up and we still need YOU to sign up for FREE!

---

## Politics

The first person that I interviewed was Dr Bacon Hair. She said that As a Blue New Deal patriot they are "always looking for new ways to improve recruitment, retention, and engagement.". Next, I asked them what the biggest change that they are looking forward to if they are re-elected, to which their response was "definitely the shopping district in Icenia". They said that it was planned to be the street coming directly for Vaughn Island as well as Jah Park and that if it's a success it could be "really good for Icenian engagement to have a boost of both foreign and local shops" in a concentrated area as many are scattered around the city center and we don't have too many at the moment. Another change that they are excited for is the worker program, which should allow more newfriends to have more variety of jobs on the path to citizenship. The idea of this is to allow established companies like Tusk and Icenian Industries, as well as non-company entities like the HOT and SOI, to work with the government to create jobs for newfriends that will allow them to rank up. They think that "the creation of as many different jobs as possible is one of the best ways to maximize engagement throughout the nation."

In their last statement, they say that they are always looking for new ways to improve Icenia and that if anyone has any ideas, great or small, that they should reach out to the BND and they will gladly take a look.

Our next interviewee was Kingstell. Kingstell is a long time icenian patriot who lives in southshie. They don't have a role in government other than being the Chief Justice. They plan to improve the community engagement / participation in the decisions affecting Icenia with more group projects. They say that "Derelictions and builds seem to be popular. Right now things are pretty split up and it doesn't feel like people are working together". And as for how to improve participation in the decisions that affect Icenia, they think that it should be left to those who primarily play in Icenia, or in their words: "banning foreign citizens from deciding what happens".

Next, I asked if they have any plans for new infrastructure projects. Kingstell said that they would like to set up a couple farms for the new wood types, like mangrove and cherry. Other than that, they say that working on our nether infrastructure is important. Mainly the transportation to our farm areas and maybe setting up some kind of neighbourhood there. They think that "the nether is ripe for profit right now and lots of resources there are underutilized".

## Politics

I also asked what advice to give the future leaders of Icenia, which was slightly patriotic. "Icenia first, we must be united", as well as: "Change the logo back to normal. I also asked what advice to give the future leaders of Icenia, which was slightly patriotic. "Icenia first, we must be united", as well as: "Change the logo back to normal."

Now, we go on to SpeedyJustice, who says this slightly deep and wise message: "I advise future leaders of Icenia to always remember who gives them their power (the voters). I think I would like to leave behind a legacy of change in Icenia, specifically democratic change. I want to be remembered as someone who loved Icenia, and believed in the will of the people

## Competition Time!

That is it so far for the election "mini publications" and the next paper is going to be a main release, by that time the competition winner for the 16d will have been picked. In case you have not seen the last message at the end of the mini publication, send your build wherever they are on the server to this channel of the discord, and you will instantly be entered!

## Editor's Message

You can really see now that people in Icenia really do care about the citizens, as if this was a real place. I'm in awe of the general community here and it is probably the best server – no, it IS the best server and community in general that I have ever joined, and I just hope that is the same for you too.
